STRING GAMES MEETING TABLES - DAISY CHAIN COMPONENTS | Designed by Madsen & Contois

- Daisy chain units are required when more than one electrical unit is specified on one top.
- To determine jumper cable length, measure length from edge of electrical unit to end of table.
- Every connection point must be a female-to-male or male-to-female connection (all daisy chain power units feature male ends).

ORDERING GUIDELINES:

- To build tandem configurations, always specify units from left-to-right as facing.
- Starter units ("-ST") represent the first seating model in a configuration with subsequent modular units building onto them towards the right.
- Add-on units ("-AO") can only be added next to starter units or other add-on units.
- End-units ("-EU") represent the final seating model in a configuration.
- Center and corner tables are for in-line placement only (cannot start or end a configuration) and for specification purposes, will always come before a starter unit, after an end unit or before/after a single chair (i.e. add-on units cannot be specified next to connecting tables).
- End tables can only start or end a configuration, therefore they will always come before a starter unit or after an end unit (i.e. add-on units cannot be specified next to connecting tables).
